Motul additive solutions

MOTUL

Power. Protection. Peace of Mind.

Your engine deserves more.

It's more than just a machine — it's the heart of your vehicle. To perform, last, and reduce its impact, it needs the right care. That care starts with Motul Additives.

Often misunderstood, additives are still overlooked by many drivers. Motul is here to change that — with a trusted, easy-to-use range designed for real-world needs. Our mission: make additives simple, effective, and accessible, so every driver can protect and boost their engine with confidence.

Motul additive solutions
Trust the Expertise. Feel the Difference.

DRIVEN BY INNOVATION SINCE 1999

For over two decades, Motul has led the way in additive technology.

With dedicated R&D teams and a specialized production facility, we've developed a complete range of powerful, reliable solutions tailored to every engine and every need.

Whether used to prevent problems or solve them, whether specific or multi-purpose, **Motul** additives deliver real, proven results. They reduce wear, limit friction, combat deposits, and prevent breakdowns — helping engines perform better, last longer, and run smoother.

A solution for every driver

ECO-CONSCIOUS DRIVERS

DPF CLEAN and E-FUEL SYSTEM CARE (hybrids)

➤ Reduce emissions. Pass inspections. Drive cleaner.

EVERYDAY PEACE OF MIND

ENGINE CLEAN and COMBUSTION CHAMBER CLEAN

➤ Clean your engine. Protect it daily. Avoid costly repairs.

SMART FIXES FOR COMMON ISSUES

Motul also offers a range of expert "troubleshooters" for specific problems:

- RADIATOR STOP LEAK: Seals critical hairline cracks and small leaks
- OIL STOP SMOKE: Reduces soot and smoke exhaust of gasoline and diesel engines for vehicles with high oil consumption

CLEANER, STRONGER, LONGER-LASTING ENGINES

Combustion or hybrid, every engine deserves the best.

Motul Additives help optimize performance, reduce harmful emissions, and provide lasting protection against wear and damage. They're not just for professionals — they're for every driver.

Use them regularly.
Drive confidently. Trust Motul.

Fuel additives

SYSTEM CLEAN (DIESEL & GASOLINE)

Motul Diesel System Clean and Fuel System Clean are two dedicated additives for diesel and gasoline engines. They share the same purpose: clean the entire fuel injection system, ensure optimal combustion, and reduce fuel consumption and engine wear.

- Effectively removes clogging and dirt in the fuel or diesel injection system.
- Water-binding effect: Removes condensation water in the engine.
- Reduces fuel consumption and engine wear.

GASOLINE

300ml

Preventive fuel
system maintenance

Curative

COMBUSTION CHAMBER CLEAN (GASOLINE)

Motul Combustion Chamber Clean is a maintenance cleaner targeting the combustion chamber. It removes operationally caused contamination at the inlet valve, pistons and the entire combustion chamber.

- Maintains cleanliness of the fuel system, pump, injectors and combustion chamber.
- Preservation of original engine power and performance.
- Reduction of fuel consumption and emissions of exhaust pollutants.
- Maintains engine reliability.

GASOLINE

250ml

Boost
performance

Curative

POWER BOOSTER (GASOLINE)

Motul Power Booster cleans injectors and inlet valves and keeps them clean. It protects the system against corrosion, removes operational caused contaminations and optimizes the atomization of the fuel and the combustion process, maintaining the engine performance.

- Designed for use in all types of gasoline engines.
- Boost power and reduce wear with increased fuel lubricity.
- Reduction of fuel consumption and better engine performance with optimized atomization of fuel and engine combustion.

HYBRID

300ml

Hybrid vehicle fuel
system care

Preventive

E-FUEL SYSTEM CARE (GASOLINE)

Motul e-Fuel System Care is a gasoline injection system care product formulated for all hybrid vehicles for preventive maintenance and performance.

- Stabilizes fuel remaining for longer period in the tank between refills.
- Protects the engine frequently and randomly used in stop & start mode and running at higher speed and load.
- Cleans the sensitive injection system operating in non-conventional hybrid mode.

DIESEL

300ml

Diesel particulate filter
efficiency enhancer

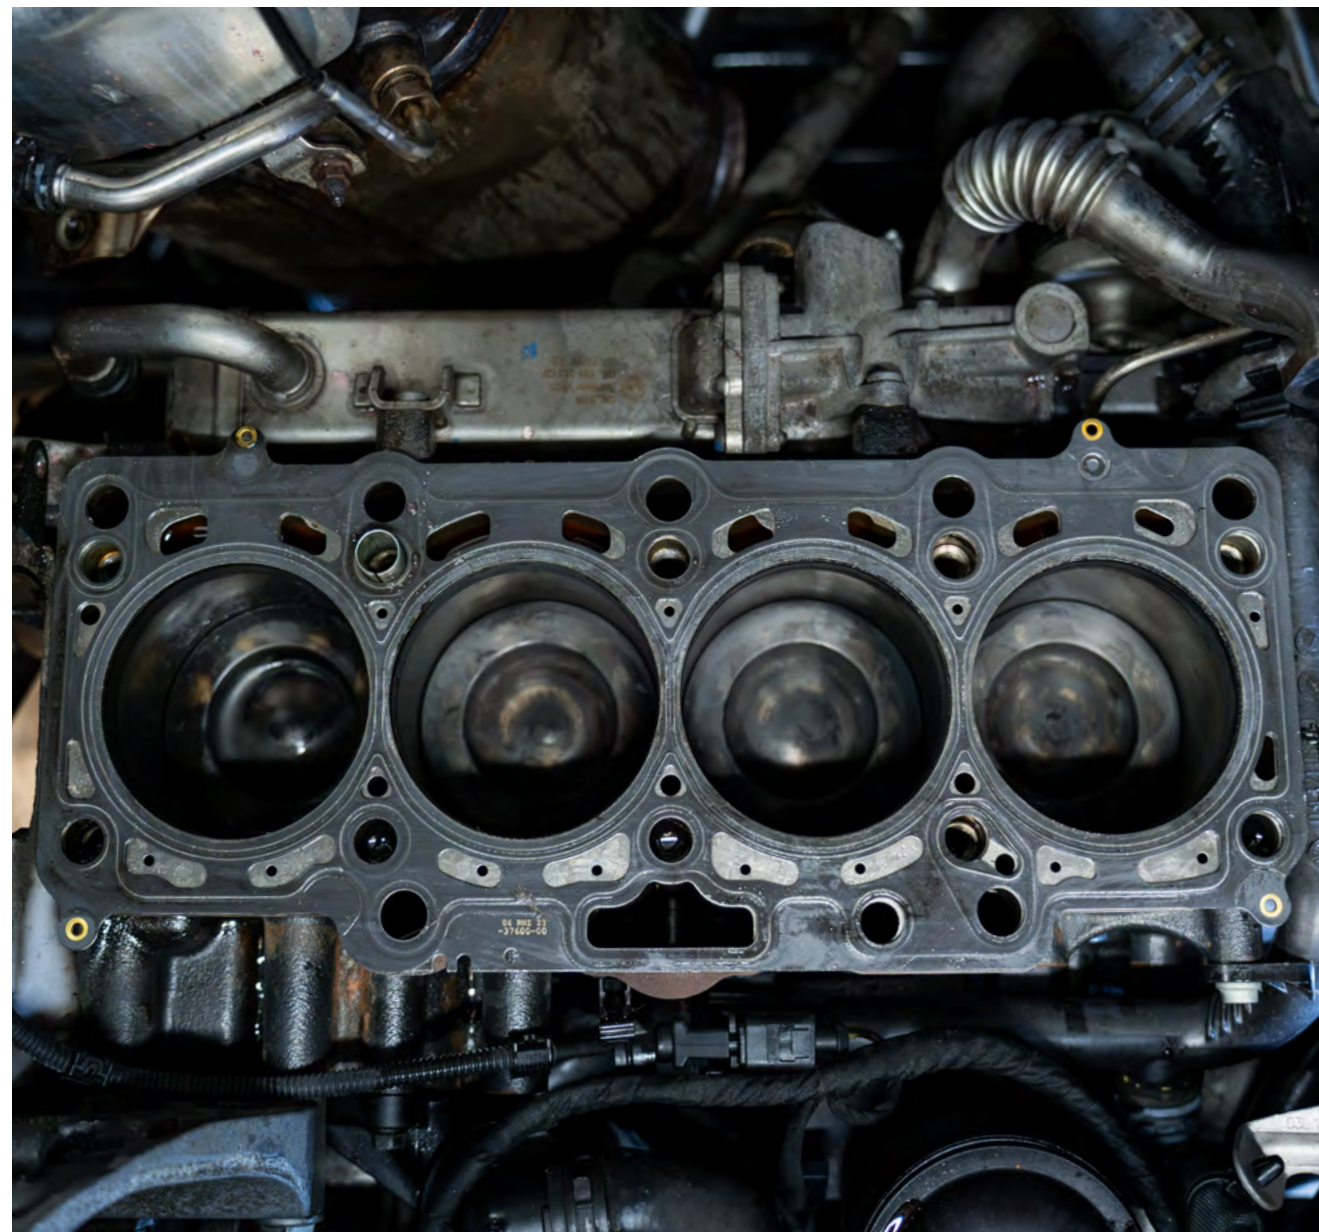

Curative

DPF CLEAN

Motul DPF Clean is a dedicated additive to support the regeneration of the diesel particulate filter, for all diesel engines. It increases the performance of the DPF regeneration, by decreasing the required temperature to start the process.

-  Faster and more efficient cleaning of the Diesel Particulate Filter.
-  Restores original engine power and performance.
-  Reduces fuel consumption and pollutant emissions at the exhaust.
-  Perfect product to use if most of the drives are made in short distances, city traffic or traffic jam.

Add regularly every 2,000 km right before filling up the tank.

Pre-oil change
cleaning additive

Pre-flush

ENGINE CLEAN AUTO

Motul Engine Clean Auto is a pre-drain additive for all types of engines, efficiently cleaning deposits and clogging which appear in the engine, by removing and evacuating micro-particles during the process of oil drain.

- Protection against wear and overheating of the engine.
- Keeps new oil clean longer and restores engine compression.
- Combined with fuel system clean (diesel or gasoline), provides reduction of pollutant emissions.
- Extends the life span and performance of the engine.

Recommended to be used before every oil change.

Counteracts
oil thinning

Post-flush

OIL STOP SMOKE

Motul Oil Stop Smoke is a highly effective additive package for reducing soot and smoke exhaust of gasoline and diesel engines. Ideal for vehicles with high oil consumption.

- Prevent oil consumption by escaping via clearance between piston ring and cylinder.
- Enhance high temperature resistance and anti-shear.
- Contain lubrication components to reduce engine wear and provide additional protection for the engine and reduce engine noise.

ALL ENGINES

Seals leaks in
cooling systems

Immediate action

RADIATOR STOP LEAK

Motul Radiator Stop Leak is a quick fix for micro cracks and small leaks in liquid cooling systems without clogging. It can be used in a curative or preventive mode.

- Designed to be used in all types of coolants.
- Immediate action, thus avoiding any immobilization of the vehicle.
- Prevents loss of cooling liquid and protects against engine damage.

Recommended to be used whenever there is a need.

ALL AUTOMATIC
TRANSMISSION
300ml

Pre-transmission fluid
cleaning additive

Pre-flush

AUTOMATIC TRANSMISSION CLEAN

Motul Automatic Transmission Clean is a predrain automatic transmission cleaner designed to be used in all types automatic transmissions, conventional with torque converters (AT), with dual clutch transmission (DCT) or with continuously variable transmission (CVT).

- Clean deposits, sludge and varnish which appear on the transmission components.
- Actively increase the driving comfort and life duration of the vehicle.
- Provide perfect lubrication during the cleaning process.

Recommended to be used before every transmission fluid change.

ENGINE CLEAN MOTO & MOTO X

Motul Engine Clean Moto and Moto X are pre-drain engine cleaning additive, to be used before oil change. It is specially designed for all types of motorcycle 4-stroke engines. It allows optimum use and full benefit from fresh oil.

-  Decreases oil and fuel consumption.
-  Evacuates deposits, varnishes and other combustion residues from sensitive areas such as hydraulics lifters or piston grooves and rings.
-  Prevents wear and overheating of the engine.
-  Extends life spans and performance of engine.

FUEL SYSTEM CLEAN MOTO & MOTO X (GASOLINE)

Motul Fuel System Clean Moto and Moto X are gasoline additive for all types of motorcycle 4-stroke and 2-stroke engines. Its formula cleans carburetors, injectors, valves and combustion chambers. It also cleans and lubricates the entire fuel system.

-  Water-binding effect: Removes condensation water in the engine.
-  Improved engine performance and riding pleasure.
-  Reduction of fuel consumption and pollutant emissions.
-  Increased lifetime of fuel system and catalytic converter.
