

Oil that's killer **MOTUL** not overkiller.

Motul's newest formulation is engineered with the same advanced technology proven on the track, but optimized for the demands of everyday engines. Developed specifically for modern import vehicles, it delivers OEM-level quality with measurable advantages in efficiency, cleanliness, and durability. High-performance oil without the high overhead—protecting engines and your bottom line.

Motul Asian Import Motor Oil protects against wear with a robust synthetic base stock and additive package that minimizes viscosity breakdown, reduces piston deposits, and improves timing chain protection. The result is longer engine life, greater fuel economy through reduced friction, and consistent performance even under high temperatures and heavy loads.

See reverse for specifications.

Increases Reliability

33% less oil thickening* improves cold-start flow and protects critical components like the timing chain and valvetrain, while reducing wear over time.

Maximizes Fuel Economy

Up to 18% better fuel efficiency* thanks to advanced friction modifiers that reduce drag and boost overall engine efficiency.

Enhances Engine Efficiency

13% fewer piston deposits* keep combustion chambers and oil passages cleaner, reducing friction losses and ensuring smoother, more efficient operation.

Delivers Consistent Performance

Exceptional shear stability maintains oil film strength and viscosity even under extreme heat and high engine loads.

*Compared to API SN standards (ASTM D8114/D8226 testing)
